Differentiators

GMP is the only fiber placement equipment manufacturer that is both an expert at aerial and underground fiber placement equipment. We pride ourselves on having extensive US engineering, design, and manufacturing capabilities from the mid-1930s. This gives GMP the added value with the capabilities to produce specialty tools for our consumer base.

Capabilities Statement

General Machine Products, a family-owned business located in Suburban Philadelphia, Pennsylvania, is a manufacturer of a wide range of products for the telecommunications, power utility, and cable television industries, and the contractors who serve them. Aerial and underground fiber optic installation manufacturer.
